- Homo black, homo polled & bred for balance
- Great choice for siring feeders or replacements

Wulfs Extra F322E - Sells as Lot 405

Foundation Feeders builds them from the ground up.

The Beef Industry and Dairy Industry are changing. Tyson is no longer purchasing Holsteins for beef supply. This has created a challenging situation for Holstein feeders and the dairies that supply those calves.

The Real "EYE" Opener

The Holstein breed has a problem with shape and size of the ribeye, something that straight angus can't correct. Our Limflex is a triple trait sire everything needed to build a terminal cross to the dairy breed fixing the ribeye, dressing percent and quality grades. We purchased the Wulfs Extra F322E at great expense but felt it a necessary investment to create the best fit.

We have partnered with Wulf Cattle and Riverview Dairy to market this sire to dairies and beef producers across the US.

Benefits to Dairy:

- Fertility
- Calving ease
- Smaller frame
- Better feed conversion
- Stronger calves
- No semen costs (\$20 per straw value)
- Calves solid black and Polled (No dehorning)
- Added value to steers and heifers
- Cash flow
